

RESET Professional

Counselling in Melbourne (CIM) — Treatment Summary Report

A — PARTICIPANT AND PROGRAM DETAILS

Name	James Thorton
Program ID	CIM_RESET_TEST001
Registered	31-08-2026 09:54:59
Program	RESET Professional — 10-Week Anger Management & Emotional Regulation Program

B — ATTENDANCE & PARTICIPATION RECORD

Program structure: 10 weekly sessions (Week 0 Intake through Week 9 Closure), delivered online. The DAR-5 is administered at Weeks 0, 5 and 9; the CAS at Weeks 0 and 9.

WEEK	SESSION / TOPIC	DATE	STATUS
0	Intake: Assessment, Orientation & Goal-Setting — CAS + DAR-5 administered	30-08-2026	Attended
1	Understanding Anger: What It Is and Where It Comes From	07-09-2026	Attended
2	Triggers, Patterns and the Anger Cycle — Personal Mapping	31-08-2026	Attended
3	Accountability Without Self-Blame: Ownership of Behaviour	22-09-2026	Attended
4	Impact Awareness: How Anger Affects Others	29-09-2026	Attended
5	Beliefs, Values & Stories — DAR-5 mid-program re-administration	05-10-2026	Attended
6	Regulation Skills: In-the-Moment Strategies	12-10-2026	Attended
7	Communication, Conflict and Connection	19-10-2026	Attended
8	Consolidation: Healthy Relationships, Maintaining Change & Relapse Prevention	26-10-2026	Attended
9	Closure: Debrief, Outcome Assessment & Certification — CAS + DAR-5 re-administered	27-10-2026	Attended

Sessions attended 10 of 10 Attendance rate 100%

Completion of this program requires attendance at a minimum of 8 of 10 sessions. Assessment rows (Weeks 0, 5, 9) are highlighted above.

Assessment framework: Two validated, free-access instruments are used in combination across three timepoints.

TOOL	ITEMS	WHAT IT MEASURES	CLINICAL CUTOFF / RANGE	ADMINISTERED
DAR-5	5	Frequency, intensity, duration, aggression, and interference with social functioning over the preceding 4 weeks.	Score 5–25. Clinical threshold: ≥ 12 indicates problem anger warranting intervention.	Weeks 0, 5 and 9
CAS	21	Intensity and maladaptive expression of clinical anger including work performance, sleep, decision-making and interpersonal relationships.	Score 0–63. 0–13: Minimal · 14–19: Mild · 20–28: Moderate · 29–63: Severe	Weeks 0 and 9

Both instruments are self-report. The psychologist's clinical observations in Sections D and E are an integral part of this report.

C1 — DAR-5 SCORES ACROSS PROGRAM

TIMEPOINT	SCORE	CLINICAL STATUS
Week 0 (Intake)	16 / 25	Above threshold (≥ 12)
Week 5 (Mid-program)	11 / 25	Below threshold (< 12)
Week 9 (Discharge)	7 / 25	Below threshold (< 12)

C2 — CAS SCORES: INTAKE VS. DISCHARGE

CAS SUMMARY	WEEK 0	WEEK 9	CHANGE
CAS Total Score	27	6	↓ 21 pts
Severity band	moderate	minimal	

Clinical domain breakdown

DOMAIN	WEEK 0	WEEK 9
Work performance / cognitive	3 / 6	1 / 6
Interpersonal interference / affective	2 / 6	0 / 6
Sleep, decision-making, physical and behavioural	12 / 24	1 / 24
Personal insight, awareness and commitment to change	7 / 15	1 / 15
Risk factors / future focus	3 / 12	3 / 12

- Work performance / cognitive: improved from 3 to 1 / 6 (a reduction of 2 points).
- Interpersonal interference / affective: improved from 2 to 0 / 6 (a reduction of 2 points).
- Sleep, decision-making, physical and behavioural: improved from 12 to 1 / 24 (a reduction of 11 points).
- Personal insight, awareness and commitment to change: improved from 7 to 1 / 15 (a reduction of 6 points).
- Risk factors / future focus: unchanged at 3 / 12.

Domain mapping confirmed by the treating psychologist, N. Lindley (AHPRA PSY0001127336), prior to use in this report.

DAR-5 trajectory across three timepoints. Dashed line = clinical threshold (≥ 12).

Week 0 — Intake

Week 9 — Discharge

Minimal Mild Moderate Severe

CAS intake vs. discharge. Colour = severity band.

RATING SCALE INDEX — WORDING PENDING CLINICAL CONFIRMATION

1 2 3 4 5

Clinical Observation Profile — psychologist ratings across six domains (Section D).

RETEST RETEST RETEST

Note for referring party: Both instruments are self-report. The psychologist's clinical observations in Sections D and E are an integral part of this report.

D — CLINICAL OBSERVATIONS: ENGAGEMENT & PROGRESS

Rating scale: 1-No insight/engagement · 2-Minimal · 3-Moderate · 4-Good · 5-Excellent/consistent.

DOMAIN	RATING	CLINICAL OBSERVATION
Engagement & attendance	4 / 5	Good
Self-awareness & insight	4 / 5	Good
Accountability & ownership	3 / 5	Average - needs work
Skill acquisition & application	2 / 5	Unaware and lacking
Communication & relational skills	2 / 5	Poor - needs work. Biggest change to improve anger
Motivation for sustained change	4 / 5	Excellent

E — CLINICAL SUMMARY NARRATIVE

TEST TEST TEST

F — CLINICAL RECOMMENDATIONS & MAINTENANCE PLAN

Needs further one-on-one sessions to continue improvement

G — COMPLETION RECOMMENDATION

- ☒ Program completed with demonstrated engagement and meaningful insight development. No further structured intervention recommended at this time.

H — CERTIFICATION & SIGNATURE
